Growth of Illegal Madarsas

*253. SHRI SUNIL SHASTRI:
SHRI ABANI ROY:

Will the Minister of HOME AFFAIRS be pleased to state:

(a) whether any security agency has recommended tough law to tackle the menace of illegal madarsas in the country as reported in The Hindustan Times, dated the 6th June, 2002;

(b) if so, whether Government propose to bring out a legislation to check the growth of unregistered and illegal madarsas in the country;

(c) if so, the details thereof;

(d) whether steps would also be taken to check flow of foreign funds for illegal madarsas in the country; and

(e) if so, the details thereof?

THE MINISTER OF STATE IN THE MINISTRY OF HOME AFFAIRS (SHRI I.D. SWAMI): (a) to (c) The Government has been advised about the need to regulate the growth and activities of madarsas. However, there is no proposal at present to bring up any legislation in this regard.

(d) and (e) Under the Foreign Contribution (Regulation) Act, 1976 various NGOs (including Madrasas) in India are permitted to receive foreign contribution from foreign sources for bona fide activities in cultural, economics educational, social or religious fields. Permission under the aforsaid Act is given only after careful verification of their antecedents. Funds which come through this source follow legal banking channels and are open to scrutiny and inspection. If any complaint of violations of the provisions of this Act comes to the notice of the Government, appropriate action is taken under the Law.

Power Projects generating less than installed capacity

†*254. SHRI RAM JETHMALANI:
SHRI RAJIV RANJAN SINGH 'LALAN':

Will the Minister of POWER be pleased to state:

(a) whether it is a fact that Power Project being run by Central

†Original notice of the question was received in Hindi.

Government are generating less power than installed capacity due to some technical defects;

(b) if so, how much less power than installed capacity was generated by each project in the year 2001-2002;

(c) the steps Government propose to take to generate powers as per the installed capacity; and

(d) the amount required to rectify the technical defects?

THE MINISTER OF POWER (SHRI SURESH PRABHU): (a) and (b) The annual electricity generation targets are fixed keeping in view the past performance of the power projects, the planned and forced outages in respect of thermal power projects and factors like design energy, reservoir level, likely in-flows etc. in respect of hydro projects. These targets are fixed in consultation with the respective power utilities. The overall generation by central sector projects in the country during the year 2001-02 has been at par with the target. The Plant Load Factor of thermal projects in central sector has been 74.3% during the year 2001-02 as against the national average of 69.9%. However, thermal generation from the DVC power projects during the year 2001-02 has been 89% of the target.

The thermal power stations of DVC are not performing to their rated capacity due to various technical problems mainly turbine problem, frequent boiler tube leakages. Bokaro 'A' is closed down for non confirming the emission norms.

The shortfall in electricity generation of hydro stations in the Central Sector is mainly attributable to low rainfall in the catchment areas of the projects.

The project-wise details are given in the statement. (*See* below)

(c) The following steps are being taken to improve the performance of generating capacity:—

(i) Revised norms for planned maintenance of large thermal units.

(ii) Early revival of units under forced outage.

(iii) Renovation and Modernisation and life extension of existing old and inefficient generating units.

(iv) Disbursement of loan by the Power Finance Corporation for improving operation and maintenance of thermal power stations under accelerated generation programme.

(v) Better maintenance procedures.

(d) The thermal power plants of DVC namely Durgapur, Chandrapura and Bokaro have been included in Renovation and Modernisation/Life Extension (R&M/LE) Programme during the 10th Plan to improve the overall performance and to extend their useful and economical life. An investment of about Rs. 1100 crores is estimated to be required.

As per the 10th Plan programme, Renovation and Modernisation, uprating and life extension of hydro stations in Central Sector was reviewed in consultation with the Central Sector utilities. 10 schemes with an aggregated installed capacity of 1571.50 MW to accrue benefit of 315.94 MW at an estimated cost of Rs. 384.23 crores are under various stages of implementation. Two hydro schemes with a total installed capacity of 762 MW to accrue benefit of 834 MW at an estimated cost of Rs. 476.20 crores are programmed for completion during the 11th Plan.

Statement

Project wise Central Sector Generation during 2001-02

Upgradation of MIG-27

*255. SHRI RAMA MUNI REDDY SIRIGIREDDY: Will the Minister of DEFENCE be pleased to state:

(a) whether it is a fact that India is planning to upgrade MIG-27 fighter jets in co-operation with Israel;

(b) if so, the details thereof; and

(c) by when they are going to be inducted into the Indian Air Force?

THE MINISTER OF DEFENCE (SHRI GEORGE FERNANDES): (a) to (c) There is a plan to upgrade MIG-27 aircraft indigenously. The induction of the upgraded aircraft is likely to start by 2005-2006 and completed by April 2008.

Fake visa racket unearthed by Delhi Police

*256. SHRI ABANI ROY: Will the Minister of HOME AFFAIRS be pleased to state:

(a) whether the Delhi Police had recently busted racket that used to arrange fake visas to European countries as reported in the Pioneer dated 9th July, 2002;

(b) if so, the *modus operandi* of the racket;
